EDUCATION

Faculty of Automatic Control and Computers (UPB)

Bachelor of Engineering in Systems Engineering

2024 – Present

Bucharest

- Control Systems, Applied Math, and **Software Engineering** (Algorithms, Distributed Systems, OOP).

Cantemir Vodă National College

High School Diploma (Advanced Computer Science)

2020 – 2024

Bucharest

- Intensive coursework in C++, Algorithm Design, and Computational Logic.

EXPERIENCE

Faculty of Automatic Control and Computers (UPB)

Programming Teaching Assistant

Oct 2025 – Feb 2026

Bucharest

- Mentored **120+ first-year students** in C programming fundamentals, focusing on memory management, pointers, and data structures.
- Simplified complex algorithmic concepts (e.g., Linked Lists, Complexity Analysis) to enhance student learning outcomes in practical lab sessions.

HBFS Robotics

Robotics & Software Engineer

Jan 2025 – Jun 2025

Bucharest

- Architected end-to-end robotic solutions integrating low-level hardware control with high-level software pipelines.
- Developed backend services using **Java (Spring Boot)** and **Vue.js**, containerized via **Docker** for scalable deployment.
- Implemented computer vision pipelines using **YOLO** and **ROS2** for real-time object detection and autonomous navigation.

PROJECTS

JobSaw – AI-Driven CV Orchestrator

Python, LangGraph, Spring Boot, Kafka, Docker

- Engineered an autonomous agent pipeline using **LangGraph & LLMs** to orchestrate complex workflows for **intelligent CV optimization** and **job scraping**.
- Architected a distributed **event-driven backend** via **Kafka** to stream real-time data between **Python AI microservices** and a **Spring Boot** core.
- Built a reactive **Vue.js interface** for visualizing **tailored CVs**, featuring a **dynamic content manager** that automatically **propagates new updates** (skills, projects) to all relevant applications.

TECHNICAL SKILLS

Core & Embedded: Java (Spring Boot), C/C++, Python, ROS2, ARM Cortex-M, IoT (SPI/I2C/CAN), YOLO

AI, Data & Ops: LangChain, LLMs, Kafka, SQL (Oracle), Docker, Git, Linux, System Design

Languages: Romanian (Native), English (Proficient)

AWARDS & CERTIFICATIONS

- ARM Summer School (2025):** Selected by Google & NXP for advanced training in embedded optimization.
- 4th Place, Hard & Soft 2025:** International Undergraduate Robotics Contest.
- Certifications:** Spring Framework in Depth, Oracle Database Design.
